

SunFX Advanced Applicator Cleaning Instruction

These instructions are to be used when the standard cleaning instructions have been ineffective.

STEP ONE

Using pliers, carefully remove the front by grasping the lower section & pulling straight out. Poke the air holes in that piece with a paper clip to free any debris.

STEP TWO

Using the pliers gently twist to the left to loosen the front black nozzle. You can then use your fingers to completely remove it.

**Grab the BASE, not the tip with your pliers!*

STEP THREE

Gently wiggle out the pick-up tube so you don't move the bolt the tube is seated in (you may need those pliers if it is stuck in place). Poke out any gunk with a bent out paper clip or skewer in both the tube and the hole where it came from.

*When reinserting the tube, make sure it points towards the front of the applicator so that the cup will fit properly. Improper insertion will result in leakage and spray malfunction.

STEP FOUR: Flush and Wash your Applicator

-Dial setting up to 12 and press trigger while holding the applicator **upside down** under hot running tap water. Flush water through all parts of the Applicator- handle, body and front. You can also immerse & soak for 10 to 15mins in hot water to help soften any clogs.

-You are trying to flush out any old trapped solution and debris so a long thorough rinse will be needed.

STEP FIVE:

Shake Applicator over sink to remove any water. This may take a number of shakes until ALL water is removed. Use the air from the turbine hose to blast out any excess water/debris.

Repeat steps 4 and 5 until you stop seeing debris flush out of the applicator.

6. Attach the hose to the applicator and turn the machine on- this will blow out any trapped water and remaining debris.

7. You can then piece your applicator back together and test for improvement. If no improvement is found, call SunFX.

8. Every week or two run a cycle of diluted bleach water (1 to 3) through the applicator to help flush out any deposits.

Any questions please call the SunFX Team IMMEDIATELY P: 888.684.3010
