

SUNFX STANDARD TANNING SOLUTION RANGE (5 to 8hrs)

These solutions are designed to be left on for 5 to 8 hours prior to the first rinse. Many may choose to “sleep in” their tan and this is OK, if the correct level was used, for your skin type. All SunFX Solution are free from all alcohols, parabens, preservatives, gluten, and nuts.

Solutions are available in 3 strengths, however, for those looking for a one size fits all we recommend our Mid-Summer formulae.

Caribbean Chocolat or Original Formulae? We find this often comes down to the technician’s preference when spraying, as both will suit all skin types. The most important consideration is selecting the right level for the client’s skin tone. The main differences are the bronzers used in each. Original uses our signature Mineral Colors and the Caribbean uses our Organic Liquid Caramel.

Caribbean Chocolat has the knack of hiding any golden tones if you have overtreated a client (too strong or too much solution used). It wears exceptionally well with little to no patchiness at the end of your tan’s life due to the caramel bronzer- great for clients that want a fuss free tan. If any tackiness is felt, use the warm air from your hose or apply a quick dusting of SunFX Finishing Powder.

The Original bronzers are powder dyes and show on the skin in a slightly more noticeable fashion. The bronzers may also offer more skin staining for the first few days. The mineral bronzers are made up of FD & C.

Can you blend them? You sure can!

You only want to stock one or two bottles. This is easily achieved. If you have wide variety of clients. Consider a Mid-Summer Standard and Dark Summer Rapid Solution. This will allow you to service all client situations.

Still unsure what to use? We suggest you try a sample of each in a Mid-Summer to gauge the differences.

<p>SunFX Clear Bronzer- Free from any Bronzer</p> <p>Sprays on clear for a gorgeous natural tan. Light Summer (9%) – Designed for fair/cool tones</p> <p>Mid-Summer (12%) – Cool, Neutral & Warm Tones (a great one size fits all)</p> <p>Dark Summer (15%) – Neutral to Warm Tones Use all skin types. SUNFX RAPID TANNING SOLUTION RANGE (2 hrs +)

These solutions allow the client to rinse the bronzers off quickly, whilst the DHA continues to react and build color. The longer the solution is left on the more color will be produced. Fair tones need to be mindful of over development if sprayed in the Dark Levels.

<p>Rapid Tan</p> <p>Bronzer- the Original in rapid form</p> <p>Produces a warm sun-kissed golden tan Rinse time is 2 to 4hrs or longer for more color What Level: Use the guide for the Original</p>	<p>Caribbean Rapid</p> <p>Bronzer- Organic Caramel</p> <p>Cool undertones for a brown/bronze tan Rinse time is 2 to 4hrs or longer for more color What Level: Use the guide for the Caribbean Chocolat</p>

SUNFX SPECIALITY TANNING SOLUTION RANGE

These Solutions are designed primarily for clients that are more on the neutral to dark tones or require a high depth of color for specific events such as dance, body building or photography work.

In saying this they can be used on all skin tones by reducing the amount of time the solution is left on the skin prior to the first rinse.

<p><u>Mocha Xpress</u></p> <p>Bronzer- A blend of mineral colors and Organic Caramel</p> <p>Produces a warm rich natural looking dark tan</p> <p>Dark (15%)</p> <p>Ultra Dark (22%)-</p> <p>Average Tan Length: 5 to 10 days</p> <p>Best For: suitable for neutral to warm tones</p> <p>Developing time: 60mins to 8 hrs</p> <p>*the longer the product is left on before initial rinse the more intense the color result.</p> <p>*can be used on fair tones by reducing initial wash time to 30 mins to 60mins.</p> <p>* color may not be visible after initial rinse, however, will contain to develop for up to 24 hr.</p> <p>Ultra Dark- observe guidelines due to the high level of DHA.</p>	<p><u>Showtime</u></p> <p>Bronzer- A blend of Mineral Colors. Based on the Original Solution</p> <p>Designed for the stage, however, the perfect solution for those wanting a solution darker than the Original Dark Summer</p> <p>18% DHA</p> <p>Developing time: 5 to 8hrs</p> <p>Average Tan Length: 5 to 10 days</p> <p>Best For: suitable for neutral to warm tones.
